

In this lecture, you will learn -

1. Understand how to write and define functions.
2. Understand different function input parameters and how to use them.

Outcome-

By the end of this lecture, you will be able to build basic programs using fundamental programming constructs like functions to divide programs into modules.

To make the best use of this lecture, we advise you to keep the following points in mind -

Take Notes: While you are watching a video, it is always good to have a pen and paper to take note of all the important concepts covered in the video. It will help you in remembering those concepts better.

Additional Resources: We have covered all the important concepts through videos and notes, but it is always better to explore some additional resources available online. We have compiled some notes after the video lecture for your reference.

Try it yourself: After watching the video try to practice the same. You can write your own additional queries and execute them on your SQL platform.
