

In this lecture, you will learn -

1. Basics of Hypothesis Testing
2. About how this testing helps in making actionable decisions
3. Difference between the null hypothesis and the alternative hypothesis.

Outcome-

By the end of this lecture, you will be able to test the hypothesis with an assumption on the population under different circumstances.

To make the best use of this lecture, we advise you to keep the following points in mind -

Take Notes: While watching a video, it is always good to have a pen and paper to note all the important concepts covered in the video. It will help you remember those concepts better.

Additional Resources: We have covered all the important concepts through videos and notes, but it is always better to explore some additional resources available online. We have compiled some notes after the video lecture for your reference.

Try it yourself: After watching the video try to practice the same. You can write your additional programs to understand concepts for better understanding.
