In this lecture, you will learn -

1. About different visualisations in Tableau like Tables, Line charts, Bars and Stacked bar charts.
2. How total impacts the overall visualisation
3. About scatter plot and outliers.
4. How Heat map improves the tables visualisation.

Outcome-

By the end of this lecture, you will be able to read and create the visualisation for any dataset.

To make the best use of this lecture, we advise you to keep the following points in mind -

Take Notes: While watching a video, it is always good to have a pen and paper to note all the important concepts covered in the video. It will help you remember those concepts better.

Additional Resources: We have covered all the important concepts through videos and notes, but it is always better to explore some additional resources available online. We have compiled some notes after the video lecture for your reference.

Try it yourself: After watching the video try to practice the same. You can write your additional programs to understand concepts for better understanding
